KEEYBOD LLC

Helping Veterans and caregivers understand and remember their care, with easy-to-read visit summaries.

CAPABILITY STATEMENT

Service-Disabled Veteran-Owned Small Business
Certified by the U.S. Small Business Administration

Company Overview

Keeybod LLC is a service-disabled veteran-owned health technology company founded by a practicing board-certified family physician and U.S. Marine Corps veteran. The Keeybod app turns a medical visit into an easy-to-read summary and a clear, current medication list, so patients and caregivers remember what was said and what to do next.

Core Competencies

- **Easy-to-read visit summaries** that are easy to remember and act on, even when stress, illness or a busy life make a visit hard to recall.
- **Medication understanding:** new, changed and stopped medicines explained simply, with an up-to-date list after each visit.
- **Follow-up support:** next steps and appointments kept in one place.
- **Caregiver support:** visit summaries and medication lists shared as printable PDFs.
- **Simple Mode** for older adults and people new to smartphones.
- **Multilingual access:** available in English, with Spanish, Haitian Creole and nine more languages being completed.

Differentiators

- **Physician-built:** designed by a practicing family physician who sees, every day, patients confused about their medicines and forgetting their next steps, such as checking their blood pressure or completing lab work.
- **Built by a Veteran, for Veterans:** service-disabled veteran-owned and operated.
- **Made for the patients who need it most:** older adults, people living with anxiety or depression, people taking many medicines, and anyone overwhelmed after a visit, in rural areas and cities alike.
- **Patient-side:** works for patients, families and caregivers after the visit, with no electronic health record integration required.
- **Privacy built in:** HIPAA Business Associate Agreements in place with its cloud and transcription vendors.

Current Status

Pre-launch. A first pilot with community clinics is in preparation. Keeybod welcomes Department of Veterans Affairs pilot partnerships, subcontracting with health technology prime contractors, and research collaborations.
